AI That Works
for Business

We are pioneers in AI automation

— transforming complex business processes into intelligent, custom-built systems, powered by top-tier Eastern European engineers

We develop software solutions that help companies optimize processes, reduce costs, and increase profits by leveraging AI and cutting-edge technologies.

Founded in 2022

↓

Over 20 custom projects delivered across the Americas, the UK, and the CIS by 2025

↓

Engineering team composed of top talent from leading Eastern European tech companies

What We Do:

- Implement intuitive and user-friendly automation
- Apply AI where it delivers maximum efficiency
- Help companies grow through the power of technology

Projects
We've Delivered
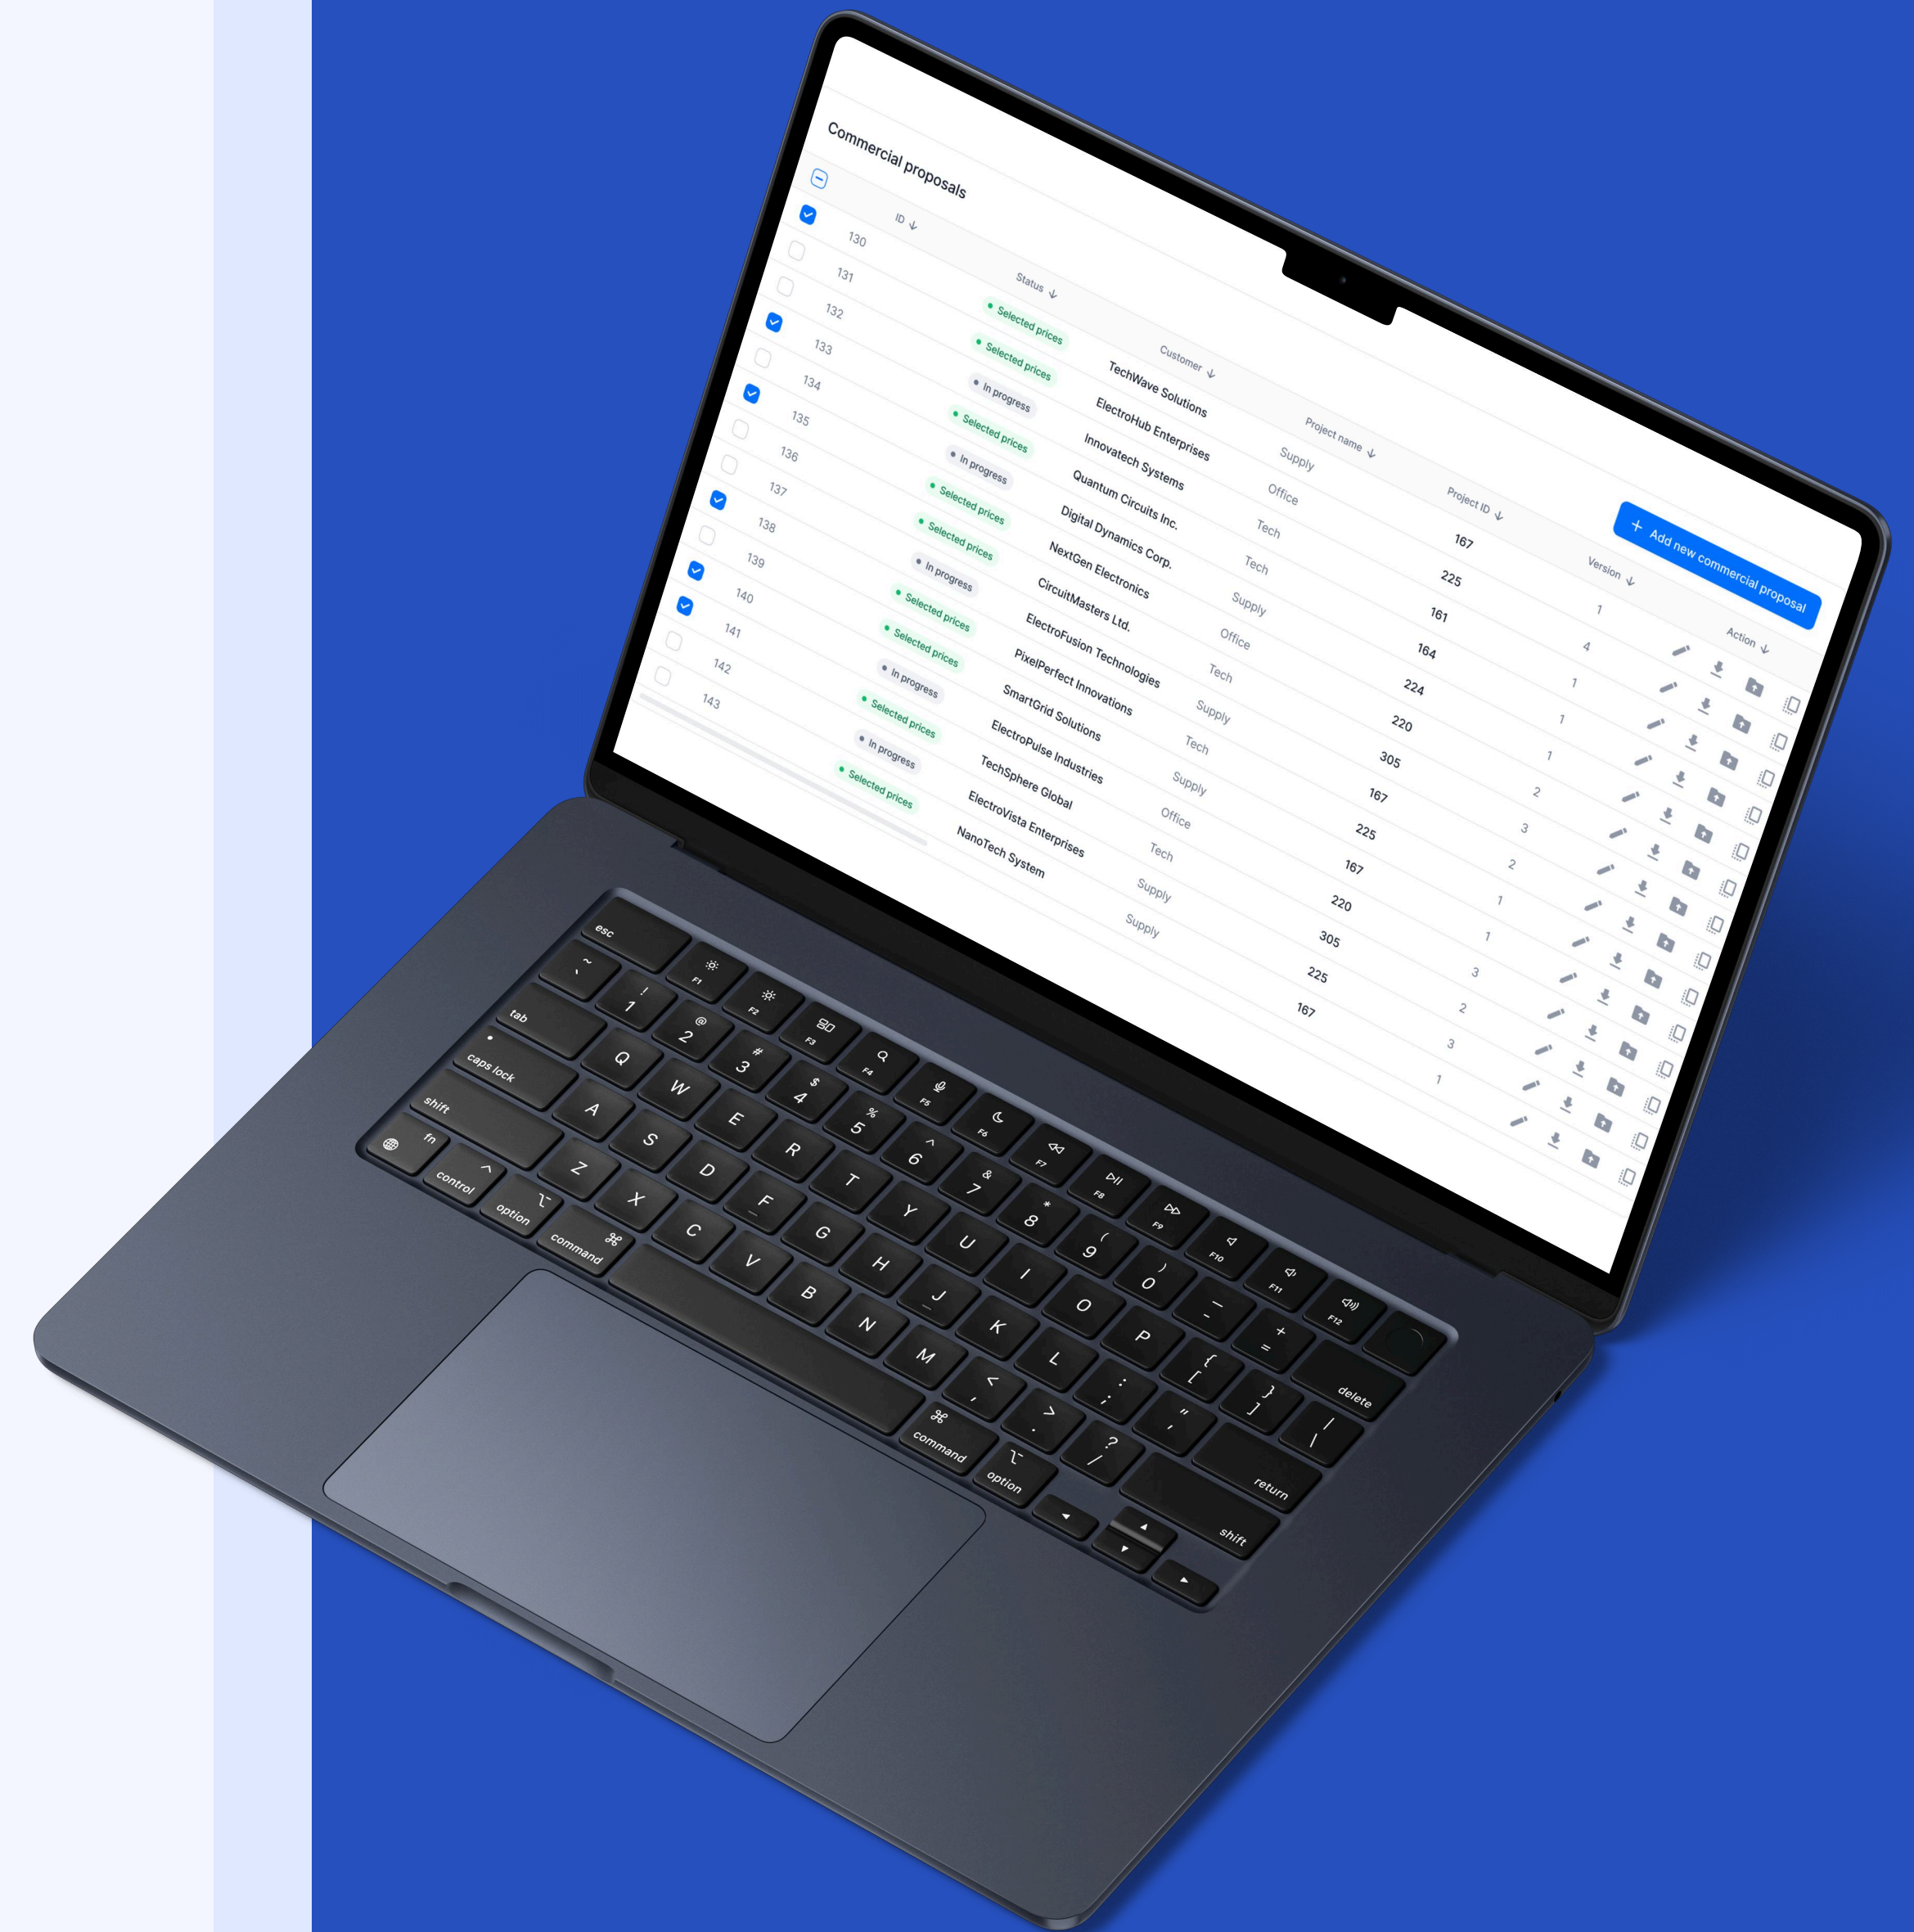

AutoProMS

Challenges:
- Manual price list processing takes hours.
- 10% mistake rate in proposals due to human input.
- Missed supplier deals from data overload.
- Non-transparent pricing invites corruption.

Solution:
- Auto-collects supplier data (API/email/files).
- Analyzes prices, stock, delivery times.
- Generates optimal purchase offers in 5 mins.
- Cuts errors by 90% with standardized formatting.

Result:
- Time saved: 800+ hours/month for 100+ orders.
- Costs down: 20-25% lower operational expenses.
- Profit up: 10-15% boost from better deals.
- Secure: Full audit trail prevents fraud.
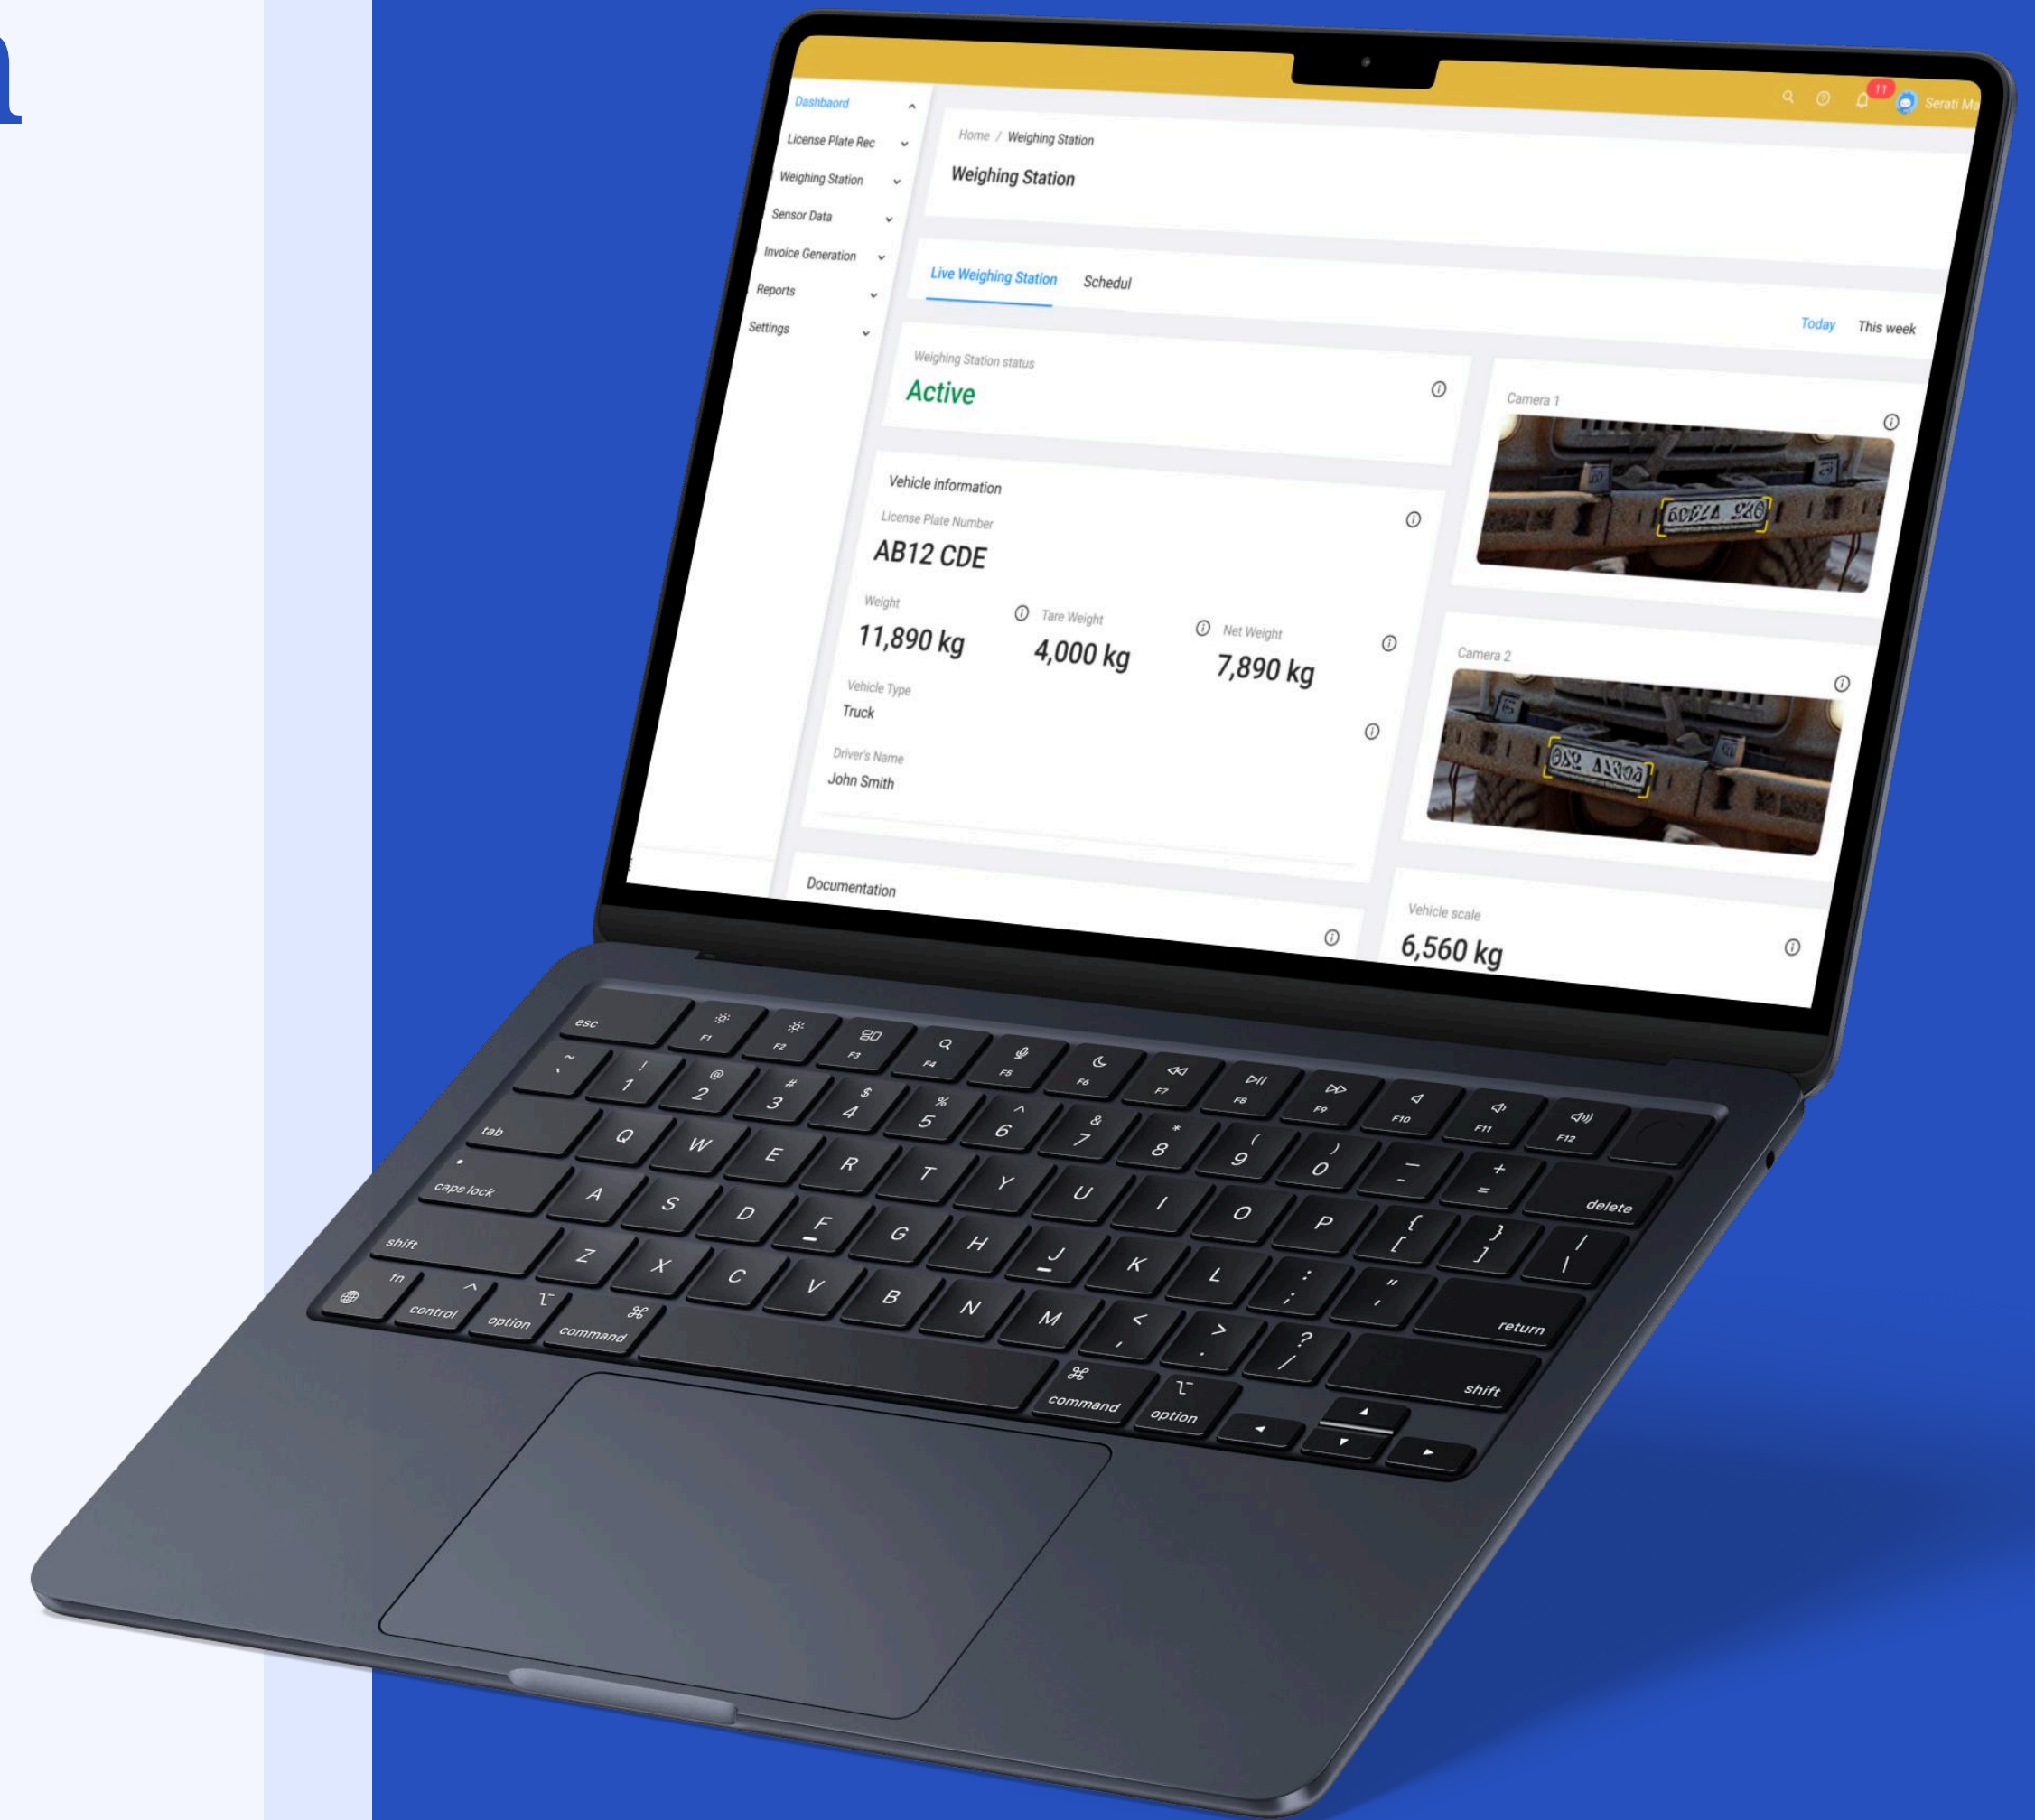

Sand Quarry Automation

Challenges:
- Unauthorized entry routes
- Errors in manual tracking

Solution:
- License plate recognition and entry automation
- Integration of scales, sensors, and SAP
- Automated invoice generation

Result:
- Improved accuracy
- Reduced delays
- Optimized resource allocation

AI Bot for Logistics and Routing

Challenges:

- Manual trip planning
- Slow and error-prone calculations

Solution:

- Telegram bot integrated with CRM and Google Maps
- AI-based route planning with real-time traffic
- Multilingual support

Result:

- Faster planning
- 90% fewer errors
- Quicker and more cost-efficient deliveries

Chatbots:

Smart Chatbots for Business

Boost sales, cut costs, and save time with intelligent, AI-powered chatbots tailored to your business.

WhatsApp/Telegram Bot Features:

- Automated replies to customer questions
- Personalized communication for better experience
- AI predicts customer needs and improves service

And Many More...

Competitor & Supplier Intelligence Tool

Automatically collects and analyzes competitor and supplier data (prices, new products) to identify new partners and secure the best deals.

Mobile Apps

A cost-effective mobile app solution that lets companies turn their website or platform into a fully functional mobile app—cutting development time and costs.

WeAreWay.Wallet

Enterprise payment service that unifies and manages multiple payment gateways, settlement accounts, and methods— streamlining online sales integration with your web application.

AIReel VideoGenerator

A Telegram bot that generates ready-to-post vertical videos (Shorts) for your social media. Just set a topic — it handles idea creation, scriptwriting, and video assembly automatically.

WeAreWay.Document Identification

An AI-powered SaaS service that recognizes and processes images of any documents— automatically saving them to a database for storage or comparison.
